EC bans roadshows, rallies in Bengal after court rap

PRESS TRUST OF INDIA
New Delhi/Kolkata, 22 April

Noting that Covid safety norms were being flouted in West Bengal during campaigning, the Election Commission on Thursday banned road shows and vehicle rallies in the state with immediate effect and said no public meeting having more than 500 people would be allowed.

The order said the commission has noted "with anguish" that many political parties and candidates are still not adhering to the prescribed safety norms during the public gatherings. The orders will come into force from 7 pm on Thursday.

Earlier on Thursday, the Calcutta High Court expressed dissatisfaction with the Election Commission of India over enforcement of Covid-19 health safety norms during the ongoing West Bengal assembly election process, including campaigning.

Hearing three public interest litigations (PILs) seeking enforcement of Covid protocol during the elections, a division bench presided by Chief Justice T B N Radhakrishnan said issuance of circulars and holding meetings on Covid safety were not enough and sought an affidavit by Friday on steps taken to enforce the norms. The PILs expressed concern that people participating in the ongoing election campaigns were not adhering to Covid norms and expressed apprehension that this may result in a serious spike in Covid-19 cases in West Bengal, which is currently facing up to a second wave of the pandemic.

"We are not satisfied with the materials

People stand in a queue to cast their vote at a polling station during the 6th phase of Assembly Election at Birati, in North 24 Parganas, on Thursday PHOTO: PTI

on record to state that the Election Commission of India and its officers on ground in West Bengal have enforced their circulars," it said.

The court said that the circulars of the ECI show the route map and the protocol for the political parties, their workers, the people at large and responsible management by the officers including the police and other forces under its command.

"Issuance of circulars and holding of meetings by themselves do not discharge the onerous responsibility of the ECI," the court observed.

The bench, also comprising Justice Arjitt Banerjee, also said it is sure that circulars are not mere advisories. The high court directed the ECI to file an affidavit by Friday listing the steps it has taken and

its views on the issues raised by it.

The bench, which heard the PILs through video conference, posted the matter for hearing on Friday in view of the urgency of the situation.

The court had on April 13 directed that in view of a resurgence of Covid-19 pandemic, all health-related guidelines on campaigning for state assembly elections be enforced in the strictest possible manner. The bench had said that it is in public interest that the administration ensures that all Covid protocols are strictly adhered to by all concerned, including those engaged in election campaigns. It had also directed that stringent measures be taken against persons who fail, neglect or refuse to obey Covid protocols.

Nifty turns 25

Today, the Nifty 50 index is the most-traded derivatives index. It is also the most-tracked index by domestic exchange traded funds (ETFs) with assets under management of \$18 billion (₹1.35 trillion). The complexion of the index has undergone a drastic change since its inception. Back in 1996, State Bank of India (SBI) had the highest weightage at nearly 8.6 per cent, followed by Tata Motors at 6.9 per cent. While both the stocks continue to be part of the index, they are no longer in the top 10, both in terms of market cap as well as weightage. Reliance Industries is currently the highest weighted stock, followed by HDFC Bank. Today, the index is dominated by banks and financial stocks. Back then, banking stocks were an important part of the index, but their combined weightage was below 20 per cent — half that of now.

Ola Electric ...

He said Elon Musk's Tesla and Chinese EV maker Nio had also rolled out their own proprietary charging ecosystem and strategy.

With Hyundai electric car, you cannot charge on Tesla's supercharger network. It is for Tesla people," said Aggarwal.

Ola Hypercharger will also be the fastest two-wheeler charging network, the firm said. The Ola Scooter can be charged 50 per cent in just 18 minutes for a 75-km range, providing superior range confidence. Ola Hyperchargers will be widely deployed across cities and will be found in city centres and dense business districts as stand-alone towers as well as in popular locations such as malls, IT parks, office complexes and cafes, ensuring that Ola Electric customers always have a Hypercharger nearby.

The home charger will require no installation and will provide customers with the convenience of charging at home by simply plugging into a regular wall socket for

overnight charging, the firm said. "We have also built navigation features," said Varun Dubey, head of marketing at Ola Electric and Ola Financial Services. "If you are going from point A to B, our app would automatically know whether you have enough charge."

The soon-to-be-launched Ola Scooter will be manufactured at the Ola Futurefactory, being built at record speed in Tamil Nadu, with its first phase to be ready this summer. The facility is being built with an investment of ₹2,400 crore on 500 acres of land. The company said the electric two-wheeler will be priced aggressively to make it accessible to all.

The Ola Scooter has already won several prestigious awards including the IHS Markit Innovation award at CES and the German Design Award. The firm said it has industry-first smart features that reimagine the entire scooter experience for customers in India and around the world.

Covid-19 impact

At a time when the second wave of Covid-19 has wreaked havoc in the country, Aggarwal said he doesn't foresee any major disruption in the roll-out of the charging network, vehicles, and setting up of the Futurefactory. "We don't forecast any major issues ourselves, but the next month is going to be critical," Aggarwal said the automotive sales were hampered by the pandemic, but EV penetration had risen drastically in Europe, China and the US. "I feel EVs are so disruptive," said Aggarwal. "EV penetration will actually thrive and grow up significantly (due to) any kind of demand issue."

Oxygen crisis...

The ministry of external affairs has been tasked with arranging the tankers.

During the meeting, Modi was informed that the states have been asked to specify their demand for oxygen so that adequate supply can be ensured. As against the current demand of 6,785 tonnes per day (tpa) of LMO from 20 states, the Centre has allocated 6,822 tpa as of April 21, according to a government press release issued after the meet-

ing. In the last few days, the availability of LMO has increased by about 3,300 tpa, with contributions from private and public steel plants, oxygen manufacturers, other industries, as well as by prohibiting the supply of oxygen to non-essential industry, the release said.

During the meeting, the Prime Minister directed that oxygen supply to various states should be unhindered and local administrations held responsible for instances of obstruction.

In his order on Thursday, Union home secretary AK Bhalla said, "No restriction shall be imposed on the movement of medical oxygen between the states and transport authorities shall be instructed to accordingly allow free inter-state movement of oxygen carrying vehicles." The instruction followed reports that the Haryana and Uttar Pradesh administrations were preventing the movement of oxygen tankers to Delhi.

Besides, states and union territories would have to abide by the supply plan of medical oxygen prepared by the empowered group (EG) II.

The Indian Railways has also been pressed into service to transport LMO tankers. One rake is slated to transport 105 tonnes of LMO from Visakhapatnam in Andhra Pradesh to Maharashtra. A similar movement of tankers will take place from Bokaro in Jharkhand to Uttar Pradesh. A 270km Lucknow to Varanasi 'green corridor', where trains carrying oxygen tankers have first right of way, was created earlier.

Tax deadline...

Also, the first installment of advance tax will have to be paid by June 15. Tax experts pointed out that small and medium enterprises will be the most hit if compliance timelines are not extended. Rajat Mohan, partner, AMRG Associates said while large taxpayers hired disaster recovery professionals and readied themselves to face any natural calamity last year after the first Covid wave, MSMEs and SMEs had been the worst hit by the second wave of the pandemic. "They have not implemented IT infrastructure like cloud computing, leading to the non-availability of technological and human resources for filing tax compliances on time. The government needs to reach out to small and medium-sized businesses and extend the timelines for all tax filings until the time the situation is under control," said Mohan.

Last year, the government provided many statutory and regulatory compliance relief measures after the national lockdown hit the country.

"In testing times like these, where there is shortage of staff due to ill health, travel restrictions/curfews etc, it becomes vital for the government to step up and relax the deadlines so that businesses and individuals can stay focussed on maintain-

ing health and business resumption rather than statutory compliances," said Rakesh Nangia, chairman, Nangia Andersen India.

The government has been supportive and responsive to the needs of the taxpayers before, and therefore it is hoped that it would afford the requisite relief soon, Nangia added.

Harpreet Singh, partner, KPMG, said that any further lockdown in states, could result in delay in undertaking compliances by GST dealers as important data, invoices, files, DSC used for signature etc may be lying in offices which are not accessible now. "...Relaxations on compliances if delayed are as good as lost, as the same may not meet the intended purpose. It would be prudent to address the compliance issues at the earliest," Singh added.

The Confederation of All India Traders (CAIT) has in a letter to finance minister Nirmala Sitharaman urged postponement of various tax compliances by three months. It said at least 11 types of compliances under GST and another 11 for income tax fall in April. "In these tough times when all the state governments are taking strict precautionary measures such as complete curfew, night curfew, 72-hour complete lockdown, complete lockdown, containment zones, etc in order to restrict the spread of Covid-19 in their states, it will not be possible to comply with all these statutory compliances on time. Therefore, with the delay in compliances on part of trade not being deliberate, the late fee and penalties should be waived off permanently," it said in the letter.

Pratik Jain, partner, Price Waterhouse & Co LLP said the situation on the ground was really bad and most people had someone in the family battling Covid. "In these circumstances, the industry does expect the government to relax the compliance timelines, particularly filing of monthly GST returns and reconciliation requirements. The GST council may meet next month to take decisions on some of these measures," said Jain.

PM on climate...

Modi said India's per capita carbon footprint was 60 per cent lower than the global average. This, he said, was because India's lifestyle "is still rooted in traditional sustainable practices". Modi said the importance of lifestyle change in climate action could not be emphasised enough. This is why India has, and will continue to welcome partners to create templates of sustainable development, he said.

"Cooperation between India and the United States particularly on financing innovation and faster deployment of green technologies would have a positive demonstration effect on other countries," he said, quoting Vivekanand: "Arise, awake, and stop not till the goal is reached."

GNFC STARTS PRODUCTION AND SUPPLY OF MEDICAL GRADE LIQUID OXYGEN FOR SERVING SOCIAL CAUSE IN CURRENT PANDEMIC

While oxygen demand has suddenly increased with rapid spread of current pandemic, immediately after resuming from its planned Annual Shutdown during first two weeks of April, GNFC has started producing and supplying medical grade oxygen. Shri Pankaj Joshi, IAS, Managing Director, GNFC mentioned that while the daily production will be around 10,000 litres which will be equivalent to 1000 cylinders a day, it has further plan of ramping up the production capacity to double it. He further elaborated that it is proud moment for him and team GNFC that it has risen to the occasion by meeting clarion call given by State and Country's leadership. GNFC modified its operations related to Air Separation Unit to address the issue of medical oxygen demand. Shri Joshi expressed that with oxygen supply free of charge for medical treatment, hopes to contribute towards saving precious human capital of country.

GSFC BEGINS MUCH NEEDED MEDICAL OXYGEN PRODUCTION

Taking a lead in responding to Prime Minister Narendra Modi's clarion call for increasing production in medical grade oxygen in a country, Gujarat State Fertilizers & Chemicals Limited has provided the much-needed respite by starting the manufacture and dispatch of 99.8% pure liquid oxygen at its facility in Vadodara. From April 12, 2021 onwards, the company has been supplying medical grade oxygen in this difficult time of the Corona pandemic. The company's management has decided that this medical oxygen supply should be provided free of cost under its CSR initiative, and accordingly, all the supplies from 12th April onwards will be treated on free of cost basis. GSFC is the first company to respond to the need to divert industrial oxygen for medical purpose. During any emergency, natural disaster, etc., the company has always stood by the local administration/state government in carrying out duty as a good corporate citizen. "GSFC has modified certain capabilities in their manufacturing operations on a war-footing basis to fill 35 Dura cylinders, each of 200 litres, which are being dispatched every day," said a company official. Almost 20 critical Covid-19 patients can be provided support through a single Dura cylinder per day, he added. For the last few days, GSFC through its air separation unit in the Caprolactam plant had started supplying liquid oxygen in Dura cylinders. Against the daily need of about 150 tonnes of medical oxygen, GSFC is likely to supply about 10 tonnes a day. The Prime Minister has directed officials to ensure smooth and seamless movement of tankers carrying oxygen throughout the country. The government has exempted all interstate movement of oxygen tankers from the registration of permits to enable easier movement. Last year, taking a lead in Prime Minister's Aatma Nirbhar Bharat initiative, GSFC initiated plans to invest Rs 1500-2000 crore for rolling out as many as 21 products where India has a strong dependency on imports, including China.

LIC COLLECTS HIGHEST EVER RS 1.84 TRILLION (LAKH CRORES) NEW PREMIUM IN CORONA PERIOD AS PER PROVISIONAL FIGURES. PAYS RS.1.34 TRILLION AS CLAIMS TO POLICYHOLDERS

India's largest life insurer, LIC, continues its impressive New Business performance despite a highly challenging Business environment due to the Corona Pandemic for the entire previous year. In the just concluded financial year 2020-21, LIC has achieved its highest ever First Year Premium Income of Rs.56,406 crores under Individual Assurance Business with a 10.11% growth over last year. LIC has also procured an impressive 2.10 crore policies, out of which 46.72 lakhs were procured in the month of March alone, with a growth of 298.82% over last year for the corresponding month. The Market Share garnered by LIC comes to 81.04% in number of Policies for the month of March 2021 and 74.58% for the year. For First Year Premium, the Market share is 64.74% for March and 66.18% for the whole year. LIC's Pension and Group Schemes Vertical also created a new record by clocking its highest ever New Business Premium Income of Rs. 1,27,768 Crores over a huge base of Rs 1,26,749 Crores in the previous year. Number of new Schemes is also a new record of 31,795.

HOLISTIC APPROACH TO HEALTH IS THE NEED OF THE HOUR, DR HARSH VARDHAN

At the online full-day Health Summit "Reimagine Healthcare" organized by IMC Chamber of Commerce and Industry on April 20, Union and Maharashtra Health and Family Welfare Ministers stressed need to strengthen healthcare system. Union Minister for health stressed on importance of preventive and promotive than curative health and talked about various government of India's program like world largest health insurance program Ayushman Bharat and others which are aimed towards holistic approach to health. "Mental health, physical fitness, right nutrition, sanitation, personal hygiene and respiratory etiquettes are crucial aspects of well-being of an individual. Building mass movement around them and sensitising the general public about the benefits of focusing on these aspects will go a long way in improving the health well being of society at large," Dr Harsh Vardhan adding that many of the government programs are working these. Maharashtra health minister mentioned about the state government's efforts towards strengthening primary health centres by providing more doctors, medicines and equipment and making tertiary health accessible in each district by setting up medical colleges. He thanked the government of India's encouraging response to this initiative. "We have tools that could help us to harness the power of technology and data. To collect, process and analyze data faster than ever before. India is poised to be the one-stop solution for health. India's strengths as a digital powerhouse can be harnessed by the health system to accelerate the progress towards high-quality, affordable, comprehensive, accountable, accessible and inclusive healthcare for all," said Rajiv Podar, President of IMC in his opening remarks.
